Introduction

Welcome

Notice to Users

Geist, a division of Vertiv, Inc., reserves the right to make changes to this document without notice to any user or reseller of this product. Geist, a division of Vertiv, Inc., also reserves the right to substitute or terminate distribution of this document, with no obligation to notify any person or party of such substitutions or terminations.

Copyrights

© 2018 - Geist, a division of Vertiv, Inc. All Rights Reserved.

Trademarks

All Trademarks contained herein are registered to Geist, a division of Vertiv, Inc.

Use and Disclosure Restrictions

The software and documentation contained in this publication are copyrighted materials.

Recovery Act Buy American

Geist products adhere to the Buy American provisions of the American Recovery and Reinvestment Act of 2009 (Recovery Act). All Geist goods manufactured in our Lincoln, Nebraska, plant have undergone substantial transformation during production.

Trade Agreements Act (TAA)

Geist goods manufactured in our Lincoln, Nebraska, plant have undergone substantial transformation during production. These Geist products adhere to U.S. Trade Agreements Act and can be supplied for GSA Schedules and other government contracts.

Geist Policy on Conflict Minerals

This document details Geist's corporate policy regarding the use of conflict minerals. The policy expressed in this document should be considered to cover the Geist and Geist Europe divisions of Vertiv Inc.

Section 1502 of the Dodd-Frank Act which was passed by the US Congress in 2010 requires certain companies to annually disclose their use of conflict minerals. Conflict minerals covered under this act include tantalum, tin, tungsten, and gold.

Although Geist is not directly subjected to the requirements of the Dodd-Frank Act, Geist recognizes that all companies within the electronics manufacturing industry supply chain are impacted by this legislation. Geist supports the intent of the law, which is the reduction of violence within the Democratic Republic of the Congo and will take several actions to both advance the goals of the Dodd-Frank Act and to provide exceptional support to our customers.

- Geist will work with our direct suppliers to identify purchased components and materials that contain tin, tantalum, tungsten or gold.
- Geist will work with our direct suppliers to trace sources of any tin, tantalum, tungsten or gold used in our products back to the smelter.
- Geist will document our efforts to trace tin, tantalum, tungsten, and gold minerals back to the smelter and will accurately report the results to our customers.
- Geist will continue to monitor industry progress in identifying conflict-free smelters and will adjust corporate policy as the electronics supply chain becomes more fully documented.

Geist will not require that our direct suppliers source only conflict-free minerals until an adequate number of smelters has been reliably identified and audited by The Electronic Industry Citizenship Coalition (EICC) and the Global e-Sustainability Initiative (GeSI) to service the electronic industry supply chain. Mandating a conflict-free supply chain before an adequate number of smelters has been identified will prohibit the use of all tin, tantalum, tungsten, and gold originating in the Democratic Republic of the Congo and surrounding countries. This prohibition would cut off the sole income source for many artisanal miners within the region and may result in increased violence within the Democratic Republic of the Congo in direct opposition to the goals of the Dodd-Frank Act. Geist will work continuously with our direct suppliers in order to annually increase the percentage of documented conflict-free minerals that are used in our products until all products can be certified as conflict-free.

WEEE Declaration

Geist Europe is obligated to finance the cost of the collection, treatment, recovery and environmentally sound disposal of all products sold by Geist Europe into the UK market this includes:

- New WEEE (displaying ‘the crossed out wheeled bin symbol’) that Geist Europe has placed onto the market after the 13th August 2005; and
- Historic WEEE (not displaying ‘the crossed out wheeled bin symbol’), when Geist Europe is supplying new WEEE that is intended to replace the historic WEEE and is of equivalent type or fulfills the same function even if the historic WEEE was manufactured by a third party.

Please contact Geist Europe on 01823 275100 for further details or to arrange collection.
(UK Only)

Document Usage

All reasonable efforts have been made to assure the accuracy of this document from any technical or typographical errors or omissions. Geist, a division of Vertiv, Inc., and its affiliates disclaim responsibility for any labor, materials, or costs incurred as a result of usage of this document. Nor shall Geist, a division of Vertiv, Inc., and its affiliates be liable for any damages, inclusive of loss of profits or data, arising from the use of or in connection with this document.

Geist, a division of Vertiv, Inc., reserves the right to make changes to this document without notice to any user or reseller of this product. Geist, a division of Vertiv, Inc., also reserves the right to substitute or terminate distribution of this document, with no obligation to notify any person or party of such substitutions or terminations.

About this Manual

This document provides an overview of Geist product(s), the major topics covered include:

- Copyright, Trademarks, and Disclosure Restrictions.
- Instructions for installing, powering and using the equipment.
- Information that will aid in managing and maintaining the equipment.

Revision History

Revision	Date	Notes	Approved By
1.0	4/30/2009	Original Published Version	BP
1.1	7/8/2009	Added Link Speed Information	BP
1.2	6/29/2010	Updated Current Monitoring Meter Name	BP
1.3	1/24/2011	Add Satellite Current Monitoring	SC & BP
1.4	3/12/2012	Add Packet Power	CG
1.5	8/6/2012	Logo Update	CG
1.6	8/20/2012	Added MJ Series	CG
2.0	7/28/2014	Layout changes	GY
3.0	9/2/2014	Corrected MJ Series Temp	GY
4.0	6/22/2017	Remove Current Monitoring and CM-3 Meter	JB
4.1	5/15/2018	Updated RoHS Statement, Vertiv changes	JB

Organization of the Manual

This Geist document contains the following product information:

- Product Specifications - This chapter describes the major product characteristics and its functional role within the system. Where appropriate, reference to cabling among product components and to other Geist product(s) is provided.
- Installation - This chapter provides installation information for the preparation and use of Geist products as well as procedures required to adequately mechanically and electrically attach Geist product into supporting systems.
- Setup - This chapter provides instructions on power-up procedures after product installation and configuration of the software and features.
- Final Checkout - Technical Support guidelines and safety information are provided in this chapter.

Audience Profile

This document is intended for use by authorized technicians experienced with some of similar product types and for personnel requiring guidance for equipment installation, operation, maintenance, and support.

On-line Documentation

This document is available on-line and within the corresponding [Geist Product Manuals](#). Additional Geist product supporting [Videos](#), [Product Literature](#) and [Case Studies](#) can be found on the [Geist Resource](#) page.

Product firmware updates can be found and downloaded from the [Geist Support](#) site, under [Firmware Updates](#).

Should this product fail within its warranty period and be in need of repair or replacement, a Return Material Authorization may be obtained on-line from the [RMA Form](#) link located within the [Geist Support](#) site.

Reporting Document Errors

Should you discover any error or identify a deficiency in this document, please take time to contact us at the following email address:

Geist-Documents@geistglobal.com

Please be sure to provide us with the document name, part number, and page number(s). Also, please provide us with description of the error or the deficiency for the document. If you would like for us to contact you, please provide us with your name and contact information.

Thank you for your time. We appreciate any comments and feedback you can provide.

Conventions

The information contained within this document is established around the framework of various conventions, which are defined as follows:

Software

- Release Management: Product name, Version control ; (GU V 3.0.0)
 - Product Name: Name of Hardware Platform
 - Version control: V(ersion) Platform #, Major #, Minor #

Hardware

Product Classification

- Power Distribution Unit
 - Basic
 - Monitored only
 - Switched only
 - Monitored + Switched
- Environmental Monitoring
- Cooling
- Data Center Infrastructure Management (DCIM)

Figure 1 The chart above depicts the symbols used on Geist overlays.

Safety

This document contains varying levels of alerts pertaining to product and user safety. The alerts are visually presented with graphics and text per Geist equipment guidelines.

The representations are:

DANGER

INDICATES AN **IMMINENT** HAZARDOUS SITUATION WHICH, IF NOT AVOIDED, WILL RESULT IN **DEATH OR SERIOUS INJURY**.

WARNING

INDICATES A **POTENTIAL** HAZARDOUS SITUATION WHICH, IF NOT AVOIDED, COULD RESULT IN **DEATH OR SERIOUS INJURY**.

CAUTION

INDICATES A **POTENTIAL** HAZARDOUS SITUATION WHICH, IF NOT AVOIDED, COULD RESULT IN **PRODUCT DAMAGE AND MINOR TO MODERATE INJURY**.

NOTE

Provides useful information that is beneficial for operation and usage of this product.

Chapter 1 - Product Specifications

Overview

The J, MJ and VHV Series products are Power Distribution Units (PDU) intended for connection to 15 or 20 Amp AC Mains. The PDUs are designed to be powered by either a single phase or a three phase AC input circuit. Three phase units can be configured for either a delta or wye input connection. J and VHV Series PDUs can optionally be configured with a Geist Current Meter that provides local monitoring and display of each output circuit current.

	<h3>NOTE</h3>
<p>Global Versions of the VHV Series are intended to be connected to a 16 Amp AC Main Branch Circuit.</p>	

Environmental

Temperature

Table 1-1 Temperature Limits

	Minimum	Maximum
Operating	10°C (50°F)	45°C (113°F) (J, VHV) 25°C (77°F) (MJ)
Storage	-25°C (13°F)	65°C (149°F)

Humidity

Table 1-2 Humidity Limits

	Minimum	Maximum
Operating	5%	95% (non-condensing)
Storage	5%	95% (non-condensing)

Elevation

Table 1-3 Elevation Limits

	Minimum	Maximum
Operating	0 m (0 ft)	2,000 m (6561 ft)
Storage	0 m (0 ft)	15,240 m (50,000 ft)

Electrical

Electrical product characteristics and performance are defined below. Also, please see the product nameplate for additional rating limits.

Receptacle Ratings

Table 1-4 Receptacle Ratings

Type	Ratings
NEMA 5-15R or L5-15R	125Vac, 12A
NEMA 5-20R or L5-20R	125Vac, 16A
NEMA 6-20R or L6-20R	250Vac, 16A
IEC-60320 C13	250Vac, 10A (UL & CSA 12A, 250Vac)
IEC-60320 C19	250Vac, 16A (UL & CSA 16A, 250Vac)

Regulatory Compliance

Geist products are regulated for Safety, Emissions, and Environment Impact per the below agencies and policies.

Underwriters Laboratories (UL)

UL Standards are used to assess products; test components, materials, systems and performance; and evaluate environmentally sustainable products, renewable energies, food and water products, recycling systems and other innovative technologies.

The UL standards specific to this equipment are listed in the UL Online Certification Library under the file number noted on the device name plate.

CE

The placement of the CE mark on a product signifies a manufacturer's declaration that the product complies with the applicable European (EU) health, safety, and environmental protection requirements, including EU legislation and product directives. The CE mark is required for products offered for sale within the European Economic Area (EEA).

The specific regulations, directives, and standards applicable to each product are specified on the Declaration of Conformity.

Federal Communications Commission (FCC)

The Federal Communications Commission (FCC) regulates interstate and international communications by radio, television, wire, satellite, and cable in all 50 states, the District of Columbia and U.S. territories. An independent U.S. government agency overseen by Congress, the commission is the United States' primary authority for communications laws, regulation and technological innovation.

The FCC standards specific to this equipment are:

This Class A device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This Class A digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

WARNING

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

RoHS/WEEE

Directive 2011/65/EU outlines the restriction of the use of hazardous substances in electrical and electronic equipment (EEE) with a view to contributing to the protection of human health and the environment, including the environmentally sound recovery and disposal of waste EEE.

Restricted substances and their respective maximum concentration values are listed below.

Restricted Substance	Maximum Concentration Value (w/w)
Cadmium (Cd):	0.01%
Mercury (Hg):	0.10%
Lead (Pb):	0.10%
Hexavalent chromium (Cr6+):	0.10%
Polybrominated biphenyls (PBB):	0.10%
Polybrominated diphenyl ethers (PBDE):	0.10%
**Bis(2-Ethylhexyl) phthalate (DEHP):	0.10%
**Butyl Benzyl phthalate (BBP):	0.10%
**Dibutyl phthalate (DBP):	0.10%
**Diisobutyl phthalate (DIBP):	0.10%

NOTE

DEHP, BBP, DBP, and DIBP restrictions are in effect as of July 2019.

Chapter 2 - Installation

Installation

1. Using appropriate hardware, mount unit to rack. See next section for examples.
2. Plug PDU into an appropriately-rated and protected branch-circuit receptacle.
3. Plug in the devices to be powered by the PDU.
4. Turn on each device connected to the PDU. Sequential power-up is recommended to avoid high inrush current.

NOTE

Branch Circuit should be sized based on the PDU's nameplate electrical rating. A 12 Amp rated PDU is intended for use on a 15 Amp Branch Circuit, while a 16 Amp rated PDU is intended for use on a 20 Amp Branch Circuit. For Global Units a 16 Amp rated PDU is intended for use on a 16 Amp Branch Circuit.

Guidelines

- If the PDU is installed in a cabinet the ambient temperature of the rack should be no greater than 45°C and 25°C for the MJ series.
- Install the PDU such that the amount of airflow required for safe operation of equipment is not compromised.
- Mount the PDU so that a hazardous condition is not achieved due to uneven mechanical loading.
- Follow nameplate ratings when connecting equipment to the branch circuit. Take into consideration the effect that overloading of the circuits might have on over-current protection and supply wiring.
- The PDU relies on the building installation for protection from over-current conditions. A certified overcurrent protection device is required in the building installation. The overcurrent protection device should be sized according to the PDU's nameplate ratings and local/national electrical codes.
- Reliable earthing of rack-mount equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit. The PDU must be connected to an earthed socket-outlet.***
- The PDU is intended for Restricted Access Locations only and only qualified service personnel should install and access the PDU.
- For pluggable equipment, install the PDU so that the input plug or appliance coupler may be disconnected for service.
- Sequential power-up of devices powered by the PDU is recommended to avoid high inrush current.
- **Caution:** Disconnect all power cords before servicing.
- The PDU is intended for use with TN, TT, or IT power supply systems

NOTE

J Series PDUs may optionally be configured as Isolated Ground units. All Isolated Ground units will be shipped with an enclosure grounding cable. This cable must be connected between the enclosure and a reliable safety ground.

Mounting

Figure 2-1 Full Length Bracket

Full Length Bracket

Using the full length bracket, mount PDU to rack as shown

Figure 2-2 Mini L Brackets

**Mini "L" Brackets (SLB-4)**

Using the mini "L" brackets, attach PDU to rack as shown

Chapter 3 - Setup

Optional Local Monitoring

Power Meter

The Geist PM-1 power meter is a low-power, high accuracy meter capable of measuring true RMS Current, Voltage, Power, and Power Factor. These values are individually shown on an easy to read, 4-digit LED Display, which continuously scrolls through the four different measured values. Each one of these displayed parameters is defined below. The Power Meter will automatically begin cycling through the displayed values when the PDU is connected to AC Mains power.

- Current: PDU output current draw measured in true RMS Amps
- Voltage: PDU output voltage measured in true RMS Voltage
- Power: PDU output power measured in Watts – referred to as real or active power
- Power Factor: Ration of real PDU output power to apparent PDU output power⁴

Figure 3-1 Power Meter

Power Meter Display

Current Meter

The Geist CM-1 current meter is a low-power, high accuracy meter capable of measuring true RMS Current. The value of current is continuously shown on an easy to read, 4-digit LED Display. The Current Meter will automatically begin to display value of output current when the PDU is connected to AC Mains power.

Figure 3-2 Current Meter

Current Meter Display

Chapter 4 - Final Checkout

Final Checkout

Technical Support

Service and Maintenance

No service or maintenance is required. Do not attempt to open the PDU or you may void the warranty. There are no serviceable parts inside the PDU other than the field replaceable Interchangeable Monitoring Device (IMD). It is recommended that power be removed from the unit before installing or removing any equipment.

The Interchangeable Monitoring Device is designed to be field replaceable by **qualified service personnel only**. The IMD is designed to be replaced while the PDU is still connected to AC Mains power. Please refer to the IMD section of this document for removal and installation instructions.

Product-Specific Safety Notices

The specific procedural safety precautions relating to this product are stated below.

General Safety

Safety is a serious matter and all precautions should be taken to guarantee a safe work and operational environment. General safety precautions must be observed during all aspects of operation, service, and repair of equipment described in this document. Failure to comply with the safety warnings, procedures and guidelines as presented in this document is in violation of the safety standards of design, manufacture, and intended use of this equipment.

You are responsible for following the safety guidelines and warnings presented in this document for this equipment. Individuals using or maintaining Geist product(s) are expected to follow all the noted warnings and safety precautions necessary for safe operation of the equipment in your environment. Geist assumes no liability for failure to comply with these requirements.

Live Circuits Safety

DANGER
HAZARDOUS VOLTAGE, CURRENT, AND ENERGY LEVELS ARE PRESENT IN THIS PRODUCT. POWER SWITCHED CIRCUITS CAN HAVE HAZARDOUS VOLTAGES PRESENT EVEN WHEN THE SWITCH IS IN THE OFF POSITION. DO NOT OPERATE THE PRODUCT WITH ANY COVER PLATE REMOVED. ALWAYS MAKE SURE THAT PRODUCT IS FULLY ENCLOSED PRIOR TO USE.

Operating personnel must:

- Not remove equipment covers. Only Geist Authorized Service Personnel or other qualified maintenance personnel may remove equipment covers for internal sub-assembly, or component replacement, or any internal adjustment.
- Not replace any equipment component with power applied to the line cord. Under certain conditions, dangerous voltages may exist even with the input power cable disconnected. Any exceptions for 'Hot-Swap' modules will be specifically noted in this product document.
- Always disconnect input power and discharge circuits before touching any sub-assembly of circuit component.

Equipment Grounding

To minimize shock hazard, the equipment chassis and enclosure must be connected to an electrical earth ground. The input power cable must be either plugged into an industry electrical code compatible receptacle or wired directly into an electrical code compatible interface. The equipment earth ground wire (typically green) must be firmly connected to the

facility electrical safety ground. The mating electrical interface to this equipment must comply with International Electromechanical Commission (IEC) standards.

Electrostatic Discharge

Geist strongly recommends that anti-static precautions be taken when installing, removing, or working on and around static sensitivity equipment. Industry approved anti-static devices such as wrist and heel straps, in conjunction with conductive foam pads, should be available and implemented only after verifying that they are in good working condition.

Electronic components such as memory modules, circuit boards, and LED displays, are sensitive to Electro-Static Discharge (ESD). Handling of such components should be done only after proper anti-static workspace conditions have been established. Any static producing packing materials such as plastic, Styrofoam, and some cardboards, should be removed and discarded in a timely manner.

Explosive Environment

Do not operate this equipment in the presence of flammable gases or fumes. Operation of any electrical equipment in such an environment constitutes a definite safety hazard.

Servicing and Adjustments

Do not attempt to service this equipment, there are no field serviceable parts or sub-assemblies. Any adjustments should be made by authorized service personnel only.

Repairs and Modifications

Because of the danger of electrocution and/or severe health hazard, do not install substitute parts or perform any unauthorized modifications of this equipment. It is best to contact Geist for Warranty and Repair Service to ensure that safety features are maintained.

**Thank You For
Purchasing Geist**
