

Part Number: City Power Monitor

## Description

The City Power Monitor is an analog sensor that enables a climate monitor to detect line voltage and send an alert through e-mail or SNMP trap if power is lost. This provides time to either restore power or properly shut-down the system before backup power is fully utilized.

- Used to detect a power outage and send alerts
- Input voltage range: 100-240 VAC
- Connects to the climate monitor via Analog Input or CCAT
- Status LEDs indicate system state

A wall transformer powers the sensor and allows the City Power Monitor to detect city power. Status LEDs in the sensor's plastic enclosure provide a visual indication that power is detected. A pair of signal wires are attached to the sensor. These wires are used to connect the City Power Monitor to a climate monitor.

## Features

### Specifications:

- Input voltage: 100-240 VAC
- Plug: US-style, British style, or Universal
- Power cable: 5' (power to sensor)
- Indicators: 3 Status LEDs
- Signal cable: 100' (sensor to monitor)
- Warranty: 1 year

### Compatibility:

- Works with all climate/power monitors with analog ports
- Compatible with CCAT Analog to Digital Interface
