

## GSM Autodialer

Part Number: APD-G06

The relay controlled GSM auto-dialer adds an additional level of alert notification.

- Can be programmed to call up to nine different phone numbers
- Can set a pre-recorded message
- Has a built-in audible alarm
- Can dial out while running on battery power

The GSM autodialer provides a unit equipped with relay outputs that can also be programmed to call up to nine different numbers and play a pre-recorded message to each person who answers, until one of them acknowledges the message by pressing the \* or # key on their phone, whenever it is triggered by the monitoring unit's output relays. The unit can also be programmed to send SMS messages rather than a phone call, it can play one of six different messages, depending on which trigger input is activated, and can call certain numbers for one trigger vs. another. It also has a built-in audible alarm, is able to dial out even while running on battery power, and can be programmed to send out a periodic "test" message to verify that the unit is operating properly. Compatible with any environmental monitor equipped with dry-contact relay outputs, such as the Watchdog 100.

Auto-dialers add an additional level of alert notification by dialing pre-programmed phone numbers.

### Sensor Details

#### GSM Auto-dialer comes with the following:

- 1 GSM GO6 auto-dialer
- 1 12VDC power supply
- 2 drywall anchors and matching screws

#### You will need:

- An activated SIM card
- 9V alkaline battery
- A Geist Climate Monitor equipped with one or more relay outputs.
- At least one length of 2-conductor alarm wire
- Appropriate tools
